EGEA, a unique international conference by Aprifel

Founded in 2003 by Aprifel*, EGEA is a unique international conference that brings together all stakeholders and draws on multidisciplinary knowledge. Its aim is to provide concrete, evidence-based recommendations for changes in practice and policy. Aprifel, the French Agency for Research and Information on Fruit and Vegetable, is an association under the French law of 1901, created in 1981. Since 2022, Aprifel has been recognised as being in the general interest. Its core mission is to analyse and disseminate knowledge on the links between fruit and vegetables and health, food safety and sustainability.
